## Science for Prevention Academic Network (SPAN)

**Project leader:** Assoc. Prof. Martina Ferić, PhD

SPAN Aims:

- Improve the integration of Prevention Science degree/quality assurance standards, methods and approaches in the European Higher Education Sector in such a way that improves the quality and increases the volume of staff and student mobility across Europe.
- Share Best Practice and facilitate the development of innovative practices in Prevention Science education and training.
- Support the development of innovative ICT-based content, services, pedagogies and practice for lifelong learning in Prevention Science
