For all students, both undergraduate and graduate level (no ECTS)	122
Physical and Health Education	122

Instructions

Exchange students are students participating in a formal exchange programme between their home university and the University of Zagreb (i.e. Erasmus, Bilateral agreements, Erasmus Mundus etc.)

Croatian is the official language in the country and therefore most of the courses will be conducted in Croatian. Faculty of Education and Rehabilitation Sciences offers 3 study programs in Croatian.

UNDERGRADUATE LEVEL (3 YEARS):

1. Rehabilitation
2. Speech and Language Pathology
3. Social Pedagogy

GRADUATE LEVEL (2 YEARS):

1. Educational Rehabilitation
2. Speech and Language Pathology
3. Social Pedagogy

- Faculty of Education and Rehabilitation Sciences does not offer full degree study programs (undergraduate or graduate) in English language.
- Incoming students can spend semester or two in our institution and choose courses in English language.
- Incoming students can choose courses from the catalogue LIST OF COURSES published on Faculty's website. List is regularly updated.
- Incoming students should choose courses from the study program which is the most similar to the study program in their home institution.
- Courses in this catalogue are divided according to study level (undergraduate or graduate) and according to study program (Rehabilitation; Speech and Language Pathology; Social Pedagogy):
 - Undergraduate students can choose courses only from the undergraduate level
 - Graduate students can choose from both levels
- All courses have course descriptions and you should read them carefully to see if you meet the course enrolment requirements and entry competences required for the course. If you do not meet these requirements, we suggest that you choose another course.
- Courses in English available to incoming students are organized as individual consultations with the teachers. Teachers can include incoming students in the lectures with Croatian students or they can have individual consultations, it is up to the teacher.
- All courses are awarded with credits using the ECTS system.

Academic Calendar 2022. /2023.

3.10.2022. MONDAY	Start of winter semester
1.11.2022. TUESDAY	All Saint's Day
18.11.2022. FRIDAY	Remembrance Day for the victims of the Homeland War
27.12.2022. - 5.1.2023.	Christmas Holidays (no classes)
6.1.2023. FRIDAY	Epiphany
27.1.2023. FRIDAY	End of winter semester
30.1. – 24.2.2023.	Winter examination period (no classes)
27.2.2023. MONDAY	Start of summer semester
9.4.2023. SUNDAY	Easter
10.4.2023. MONDAY	Easter Monday
14.4.2023. FRIDAY	Day of the Faculty of Education and Rehabilitation Sciences University of Zagreb
1.5.2023. MONDAY	Labour Day
30.5.2023. TUESDAY	Statehood Day
8.6.2023. THURSDAY	Corpus Christi
9.6.2023. FRIDAY	End of summer semester
12.6. – 7.7.2023.	Summer examination period (no classes)

Course description for undergraduate study programme Rehabilitation

Planning Programme in Rehabilitation of Children and Youth with Intellectual Disabilities (144647)			
1. GENERAL INFORMATION			
1.1. Course teacher	Assis.Prof. Ljiljana Pintarić Mlinar, PhD	1.6. Year of the study programme/ semester (summer, winter)	3 rd / 5 th (winter)
1.2. Name of the course	Planning Programme in Rehabilitation of Children and Youth with Intellectual Disabilities	1.7. Credits (ECTS)	4
1.3. Associate teachers		1.8. Type of instruction (number of hours L+E+S+ e-learning)	30+15+15 + e-learning
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate Rehabilitation	1.9. Expected enrolment in the course	
1.5. Status of the course	Obligatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	2
2. COURSE DESCRIPTION			
2.1. Course objectives	Basic knowledge about goals and content of rehabilitation program for children with intellectual disabilities		
2.2. Course enrolment requirements and entry competences required for the course	Child psychology courses and passed exams Educational psychology/Pedagogy Preschool pedagogy		
2.3. Learning outcomes at the level of the programme to which the course contributes	Piaget's stages of cognitive development; human functioning from typical to <u>atypical</u> development; Bronfenbrenner's <u>ecological systems theory</u> is concerned with the broad social environment and context (Bronfenbrenner, 1977, 1986; Bronfenbrenner & Ceci, 1994).		

Planning Programme in Rehabilitation of Children and Youth with Intellectual Disabilities (144647)						
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Theoretical foundations for rehabilitation program structuring; practical skills in needs' assessment; rehabilitation program activities application (under supervision of diploma level professional) focused on children with intellectual and developmental needs as well as their social support					
2.5. Course content broken down in detail by weekly class schedule (syllabus)	Developmental perspective in assessment and program planning; Ecological; transactional activity and curriculum-based assessment and intervention Phases in Program development; Communication and Behavioral Patterns Family participation					
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input checked="" type="checkbox"/> partial e-learning <input type="checkbox"/> field work					2.7. Comments:
	<input checked="" type="checkbox"/> independent assignments <input checked="" type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)					
2.8. Student responsibilities						
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	0,5	Research	1	Practical training	-
	Experimental work	-	Report	0,2	Exercises	0,5
	Essay	-	Seminar essay	0,3	(other)	
	Tests	0,5	Oral exam	0,5	(other)	
	Written exam	0,5	Project	-	(other)	
2.10. Grading and evaluating student work in class and at the final exam						
2.11. Required literature (available in the library and via other media)	Title				Number of copies in the library	Availability via other media

Planning Programme in Rehabilitation of Children and Youth with Intellectual Disabilities (144647)			
	Santrock, J. W. (1994): Child development (6th ed.). Madison, Wisconsin: Brown and Benchmark Publishers	1	
	Mirenda, P., & Donnellan, A. M. (1987). Issues in curriculum development. In D. M. Cohen & A. M. Donnellan (Eds.), <i>Handbook of autism and pervasive developmental disorders</i> (pp. 211-226). New York: John Wiley	1	Via internet
2.12. Optional literature (at the time of submission of study programme proposal)	Goodman, Joan, F. (1992) : When Slow is Fast Enough; The Guilford Press, 1992, New York Davies, D. (1999): Child Development, The Guilford press, New York		
2.13. Quality assurance methods that ensure the acquisition of exit competences			
2.14. Other (as the proposer wishes to add)			

Learning Disabilities (32658)

1. GENERAL INFORMATION

1.1. Course teacher	Assoc. Prof. Ana Wagner Jakab, PhD	1.6. Year of the study programme/ semester (summer, winter)	2 nd / 3 rd (winter)
1.2. Name of the course	Learning Disabilities	1.7. Credits (ECTS)	4
1.3. Associate teachers		1.8. Type of instruction (number of hours L+E+S+ e-learning)	30+15+15
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate study programme Rehabilitation	1.9. Expected enrolment in the course	50
1.5. Status of the course	Mandatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1

2. COURSE DESCRIPTION

2.1. Course objectives	Introduction to the field of learning disabilities (history, definition, characteristics, causes ..), knowledge about possible developmental risks (self-perception, social competence, relations with family, teachers, peers) and practice in schools (observations in inclusive classes).
2.2. Course enrolment requirements and entry competences required for the course	
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Academic writing skills- student will be able to report and describe in short specific topic by using arguments and referencing literature and make critical reviews.</p> <p>Presentation- student will be able to present his/her work in front of the group, make presentation, differentiating main facts and make conclusions</p> <p>Personal competences - student will be able using all available sources in learning and developing, identifying some of personal competencies and field of growth, integrating knowledge from different sources.</p>

Learning Disabilities (32658)			
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Student will be able to: define learning disabilities (LD) and attention deficit hyperactivity disorder (ADHD), describe characteristics of LD and ADHD, list main periods, authors and findings through history of the field, list causes and risk factors in development of LD and ADHD, describe and recognise needs of children with LD in family and school environment, recognise basic characteristics and risks in social and emotional development of children with LD, observe children behavior and climate in inclusive classrooms.		
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ol style="list-style-type: none"> 1. Definition of learning disabilities 2. History of the field of LD 3. Causes of LD 4. Prevention and early reading skills 5, 6. Reading and writing disabilities 7. Early mathematics' skills 8. Math learning disabilities 9. ADHD 10. Social-emotional characteristics and risks 11. Family environment 12. School environment 13, 14. Analysis of video materials 15. Discussion, evaluation, conclusion of complete learning process in this course. 		
2.6. Format of instruction:	<table style="width: 100%; border: none;"> <tr> <td style="width: 50%; vertical-align: top;"> <input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input checked="" type="checkbox"/> partial e-learning <input type="checkbox"/> field work </td> <td style="width: 50%; vertical-align: top;"> <input type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input checked="" type="checkbox"/> work with mentor <input type="checkbox"/> (other) </td> </tr> </table>	<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input checked="" type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input checked="" type="checkbox"/> work with mentor <input type="checkbox"/> (other)
<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input checked="" type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input checked="" type="checkbox"/> work with mentor <input type="checkbox"/> (other)		
2.7. Comments:	International students will have opportunity to involve in course through consultations with course teachers		
2.8. Student responsibilities	Lectures and exercises attendances are obligatory. International students are obligated to attend consultations and exercises. Students are responsible to write and present seminars.		

Learning Disabilities (32658)				
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	1	Research	Practical training
	Experimental work		Report	Exercises 1
	Essay		Seminar essay 1	(other)
	Tests		Oral exam 1	(other)
	Written exam		Project	(other)
2.10. Grading and evaluating student work in class and at the final exam	Students will be evaluated through their active participation (personal and group work) in lectures, seminars and exercises. In final exam it is important not only to show knowledge, information and facts but also to elaborate it.			
2.11. Required literature (available in the library and via other media)	Title		Number of copies in the library	Availability via other media
	Hallahan, Lloyd, Kauffman, Weiss, Martinez (2005.): Learning disabilities foundations, characteristics and effective teaching, Pearsons.			
	Bender W.N. (2004.) Learning disabilities, characteristics, identification and teaching strategies, Pearson

Cvitković, D., (2010.): Anksioznost i obiteljska klima kod djece s teškoćama učenja, doktorska disertacija, Edukacijsko-rehabilitacijski fakultet, Sveučilište u Zagrebu				

Learning Disabilities (32658)

2.12. Optional literature (at the time of submission of study programme proposal)

Čudina-Obradović, M. (1995.): *Igrom do čitanja*, Školska knjiga, Zagreb.

2.13. Quality assurance methods that ensure the acquisition of exit competences

2.14. Other (as the proposer wishes to add)

Assessment of Persons with Visual Impairment (131038)

1. GENERAL INFORMATION

1.1. Course teacher	Assoc. Prof. Sonja Alimović, PhD	1.6. Year of the study programme/ semester (summer, winter)	2 nd / 3 rd (winter)
1.2. Name of the course	Assessment of Persons with Visual Impairments	1.7. Credits (ECTS)	3
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	30+15+0
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate study programme Rehabilitation	1.9. Expected enrolment in the course	10
1.5. Status of the course	Mandatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1

2. COURSE DESCRIPTION

2.1. Course objectives	To educate students about the main methods, techniques and instruments used in the assessment of the visually impaired.
2.2. Course enrolment requirements and entry competences required for the course	
2.3. Learning outcomes at the level of the programme to which the course contributes	<ol style="list-style-type: none"> 1. Explain milestones of typical development of children 2. Identify developmental discrepancies 3. Identify the needs of children with disabilities for support according to education and rehabilitation assessment 4. Apply education and rehabilitation procedures aimed at improving the overall development and functioning of children and persons with disabilities (all types and degrees of illness, injury and disorders; all levels of functioning and all age groups) within the individual (developmental) areas

Assessment of Persons with Visual Impairment (131038)

	<ol style="list-style-type: none"> 5. Judge critically on obtaining rights and taking responsibilities for participants involved in social inclusion of children and persons with disabilities 6. Evaluate the ethical challenges of the field and represent a valid ethical principle 7. Recognize and select scientifically valid and relevant facts 8. Communicate ideas, problems and solutions from education and rehabilitation field to general population 9. Evaluate the necessity of continuing professional and personal development 10. Plan continuing education in professional and related professional areas
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ol style="list-style-type: none"> 1. Define and describe methods and techniques used in assessment of persons with visual impairment 2. Identify and explain instruments used in assessment of persons with visual impairment 3. Explain visual impairment influence on other developmental areas 4. Correlate assessment results to education and rehabilitation procedures 5. Identify the importance and the purpose of the assessment in person with visual impairment in a context of rehabilitation program development
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Methods and techniques used in assessment of persons with visual impairment 2. Visual impairments 3. Influence and correlation of developmental areas in visual impairment 4. Assessment instruments 5. Early assessment in persons with visual impairment 6. Visual development (assessment and instruments) 7. Social skills assessment in persons with visual impairment 8. Daily living skills assessment in persons with visual impairment 9. Literacy assessment in persons with visual impairment 10. Orientation and mobility assessment in persons with visual impairment 11. Assessment of using assistive technology 12. Assessment of school integration

Assessment of Persons with Visual Impairment (131038)						
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments:			
2.8. Student responsibilities	Lectures and exercises attendances are obligatory. International students are obligated to attend consultations and exercises. Students are responsible to write and present seminars.					
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	0,5	Research	Practical training	0,5	
	Experimental work	0,5	Report	Exercises		
	Essay		Seminar essay	(other)		
	Tests		Oral exam	1,5	(other)	
	Written exam		Project		(other)	
2.10. Grading and evaluating student work in class and at the final exam	Final grade is going to be calculated from results of essay and oral exam. A level of activity in practical work and discussions is going to influence on final grade if between two.					
2.11. Required literature (available in the library and via other media)	Title		Number of copies in the library	Availability via other media		
	Barraga, N., Morris, J.E. (1980):. Program to Develop Efficiency in Visual Functioning, APH, Louisville, Kentucky		2	No

Assessment of Persons with Visual Impairment (131038)

2.12. Optional literature (at the time of submission of study programme proposal)	<p>Koenig, A.J., Ross, D.B. (1991): A procedure to evaluate the relative effectiveness of reading in large and regular print. <i>Journal of Visual Impairment and Blindness</i>, 84, 5, 198-204</p> <p>Mancil, G.L. (1986): Evaluation of reading speed with four low vision aids. <i>American Journal of Optometry and Physiological Optics</i>, 63, 708-713.</p> <p>Corn, L.A., Koenig J.A. (1996): <i>Foundations of low vision: Clinical and functional perspectives</i>, Chapter 9 and 10. AFB Press, New York, 185-246</p>
2.13. Quality assurance methods that ensure the acquisition of exit competences	On-line student survey;
2.14. Other (as the proposer wishes to add)	

Adaptation of Teaching Aids for Persons with Visual Impairment (131040)

1. GENERAL INFORMATION

1.1. Course teacher	Assoc. Prof. Sonja Alimović, PhD	1.6. Year of the study programme/ semester (summer, winter)	3 rd / 5 th semester (winter)
1.2. Name of the course	Adaptation of Teaching Aids for Persons with Visual Impairment	1.7. Credits (ECTS)	2
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	15+15+0
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate study programme Rehabilitation	1.9. Expected enrolment in the course	15
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	

2. COURSE DESCRIPTION

2.1. Course objectives	<p>To introduce students to basic teaching aids.</p> <p>To teach students about techniques of teaching aids adaptation for blind and low vision pupils.</p> <p>To capacitate students to adapt teaching aids for working with pupils with visual impairments.</p>
2.2. Course enrolment requirements and entry competences required for the course	
2.3. Learning outcomes at the level of the programme to which the course contributes	<ol style="list-style-type: none"> 1. Explain milestones of typical development of children 2. Identify developmental discrepancies 3. Explain developmental characteristics of children with disabilities

Adaptation of Teaching Aids for Persons with Visual Impairment (131040)		
	<ol style="list-style-type: none"> 4. Apply education and rehabilitation procedures aimed at improving the overall development and functioning of children and persons with disabilities (all types and degrees of illness, injury and disorders; all levels of functioning and all age groups) within the individual (developmental) areas 5. Apply the procedures for the equalization of opportunities of children and persons with disabilities 6. Judge critically on obtaining rights and taking responsibilities for participants involved in social inclusion of children and persons with disabilities 7. Communicate ideas, problems and solutions from education and rehabilitation field to general population 8. Demonstrate professional cooperation skills 9. Represent the attitude of respect for the diversity of children and persons with disabilities 10. Evaluate the necessity of continuing professional and personal development 11. Plan continuing education in professional and related professional areas 	
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<p>List and describe the teaching aids.</p> <p>Explain teaching methods and forms, types of lessons and teaching principles.</p> <p>Explain techniques of teaching aids adaptation for the visually impaired.</p> <p>Explain techniques of teaching aids adaptation for the blind.</p> <p>Describe how to methodically initiate and adapt teaching aids to work with students with visual impairments.</p>	
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ol style="list-style-type: none"> 1. The system of education for visually impaired students; needs, commitments and adjustments 2. Phenomenology of vision 3. Principles of teaching aid adaptations 4. Basis for making tactile aids 5. Basis of making auditory learning aids 6. Adapting the textbook to a blind student 7. Adapting the textbook to a partially sighted student 	
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> independent assignments	2.7. Comments:

Stimulating Perceptive-Motoric Abilities (131045)

1. GENERAL INFORMATION

1.1. Course teacher	Assis. Prof. Ljiljana Pintarić Mlinar, PhD	1.6. Year of the study programme/ semester (summer, winter)	3 rd / 6 th semester (summer)
1.2. Name of the course	Stimulating Perceptive-Motoric Abilities	1.7. Credits (ECTS)	3
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	15+30+0
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate, Rehabilitation	1.9. Expected enrolment in the course	40
1.5. Status of the course	optional	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1 10 %

2. COURSE DESCRIPTION

2.1. Course objectives	Theoretical contents as practical assignments presented provide student with knowledge about the importance of perceptual – motor abilities and interventions as complementary rehabilitation in enhancing readiness for learning of children with ID
2.2. Course enrolment requirements and entry competences required for the course	Basic knowledge /foundations in developmental psychology Assessment of children with disabilities
2.3. Learning outcomes at the level of the programme to which the course contributes	Students will learn how to: <ul style="list-style-type: none"> • use educational support and rehabilitation intervention in enhancing general development of children with developmental disabilities as well as their functional skills (referring to whole range of disabilities, levels of functioning, and age) • how to describe and explain professional information, ideas, problems and solutions to public
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	After theoretical and practical assignments obtained in course student <ul style="list-style-type: none"> - will obtain knowledge of fundamental systems of perception (be able to list those)

Stimulating Perceptive-Motoric Abilities (131045)

- will know how perceptual modalities are connected to learning prerequisites
- will be able to explain / describe connectedness of perceptual experience and understanding of instructions; foundations of pre- school curricula requirements; with supervision of postgraduate professional in inclusive education and rehabilitation will be able to conduct sessions of programme of perceptual - motor stimulation primarily in work with children with mild to moderate /severe intellectual disabilities
- will gain knowledge on learning prerequisites and use those in creating perceptually based intervention for improvement of readiness for learning in children with mild cognitive delay
- will conduct (under supervision of postgraduate professional in inclusive education and rehabilitation) sessions for stimulation of development of specific perceptive modalities as complementary rehabilitation intervention necessary for making individualized and adjusted educational curriculum

2.5. Course content broken down in detail by weekly class schedule (syllabus)

- week 1, 2
 Relatedness of school readiness and bio-pycho - social influences (cognitive development, perceptual abilities, level of social adaptation, experience and interactions)
- week 2
 Perceptual experience, understanding - preference and attitude's development
- week 3
 perceptual abilities in spatial and temporal organization
- weeks 4 - 12
 PERCEPTUAL MODALITIES AND functional skills
- figure - ground differentiation
- a) hand-eye coordination
 - b) sequencing and rhythm
 - c) visual memory, sequencing and rhythm
 - d) visual closure (ending)
 - e) perceiving spatial relations in two- and three-dimensional space
 - f) auditory perception (receiving sound from surrounding, interpretation, rhythm)

Stimulating Perceptive-Motoric Abilities (131045)					
	g) tactile - kinaesthetic / proprioceptive perception (and related skills in stimulation of school readiness) h) taste, olfactory (naming, discrimination) WEEK 13 - 15 PERCEPTUALLY BASED intervention (structure of programme for improving perceptual - motor abilities)				
2.6. Format of instruction:	<input type="checkbox"/> lectures <input type="checkbox"/> seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments:		
2.8. Student responsibilities

Communication of Persons with Visual Impairment (32349)

1. GENERAL INFORMATION

1.1. Course teacher	Assoc. Prof. Sonja Alimović, PhD	1.6. Year of the study programme/ semester (summer, winter)	1 st / 2 nd (summer)
1.2. Name of the course	Communication of Persons with Visual Impairments	1.7. Credits (ECTS)	3
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	30+15+15
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate, Rehabilitation	1.9. Expected enrolment in the course	25
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	

2. COUSE DESCRIPTION

2.1. Course objectives	<p>To introduce students in communication patterns development of children with visual impairment</p> <p>To make students aware of problems that visually impaired children have in the development of communication at an early age</p> <p>Introduce students to causes of early visual impairment and their impact on the overall development of a child, with an emphasis on the development of child's communication</p> <p>Introduce students to the possibilities of early (re)habilitation in order to stimulate the overall development, with a focus on socio-emotional development and the development of communication at an early age</p> <p>To develop critical thinking skills and abilities to discuss the topics of the course</p>
2.2. Course enrolment requirements and entry competences required for the course	Student is supposed to have the basic knowledge from psychology.

Communication of Persons with Visual Impairment (32349)

2.3. Learning outcomes at the level of the programme to which the course contributes	<ol style="list-style-type: none"> 1. Explain millstones of typical development of children 2. Identify developmental discrepancies 3. Explain developmental characteristics of children with disabilities 4. Identify the needs of children with disabilities for support according to education and rehabilitation assessment 5. Evaluate the ethical challenges of the field and represent valid ethical principles 6. Recognize and select scientifically valid and relevant facts 7. Communicate ideas, problems and solutions from education and rehabilitation field to general population 8. Demonstrate professional cooperation skills 9. Represent the attitude of respect for the diversity of children and persons with disabilities 10. Evaluate the necessity of continuing professional and personal development 11. Plan continuing education in professional and related professional areas 12. Demonstrate the skills of active learning and critical thinking
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<ol style="list-style-type: none"> 1. Describe and give an example of a way the visual impairment is affecting communication. 2. Identify and explain the basic causes and possible symptoms of visual impairment in childhood. 3. Anticipate how visual impairment affects a child's development in other areas (motor skills, cognition, self-care, socialization). 4. Identify developmental discrepancies in children with the visual impairment 5. Explain developmental characteristics of children with visual impairments 6. List, define and explain the methods of visual stimulation and their impact on developing functional vision at early age. 7. Conclude how the child should be stimulated in order to reduce the negative impact of visual impairment on other developmental areas.
2.5. Course content broken down in detail by weekly class schedule (syllabus)	
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> independent assignments

Course description for graduate study programme Educational Rehabilitation

Individual education programmes (39409)			
1. GENERAL INFORMATION			
1.1. Course teacher	Prof. Zrinjka Stančić, PhD	1.6. Year of the study programme/ semester (summer, winter)	2 nd / 3 rd (winter)
1.2. Name of the course	Individual education programmes	1.7. Credits (ECTS)	5
1.3. Associate teachers	Ana-Marija Bohaček, univ. spec. rehab. educ.	1.8. Type of instruction (number of hours L + E + S + e-learning)	15+30+15
1.4. Study programme (undergraduate, graduate, integrated)	Graduate, study programme Inclusive Education and Rehabilitation	1.9. Expected enrolment in the course	25
1.5. Status of the course	obligatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	/
2. COURSE DESCRIPTION			
2.1. Course objectives	To enable students to offer quality support to teachers, pupils with disabilities and their parents		
2.2. Course enrolment requirements and entry competences required for the course	<ul style="list-style-type: none"> ▪ appropriate knowledge of English ▪ appropriate knowledge of developmental psychology ▪ appropriate knowledge of teaching strategies 		
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Academic writing skills-student will be able to report and describe in short specific topic by using arguments and referencing literature and make critical reviews.</p> <p>Presentation-student will be able to present his/her work in front of the group, make presentation, differentiating main facts and make conclusions</p>		

Individual education programmes (39409)	
	Personal competences-student will be able using all available sources in learning and developing, identify some of personal competencies and field of growth, integrating knowledge from different sources.
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<p>Student will be able to:</p> <ul style="list-style-type: none"> examine social context of school, classroom observe, assess and describe educational needs of pupil(s) with SEN, in collaboration with teacher, SENCO and parent(s) observe, assess and describe learning style of pupil(s) with SEN, in collaboration with teacher, SENCO and parents construct Individual Plan of Support, in collaboration with teacher, SENCO construct monthly IEP for one school subject (Math or Maternal language or Science) recognize ethical challenges in inclusive classroom provide support to teacher and pupil with SEN in the school surrounding (in the classroom, out of classroom)
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ul style="list-style-type: none"> Introduction to the course Legislation point-to international inclusive education Legislation point-to national inclusive education School Centred Planning or Pupil Centred Planning Three steps in creating IEP (assessment-plan of support-evaluation) MAPS- Person Centred Planning for Pupils MAPS- Plan of active action – opinion of parent, teacher and pupil MAPS - role play The role of educational rehabilitator at inclusive school (guest lecturer) Plan of support Evaluation and grading (guest lecturer) ICT and pupils with complex communication needs Teaching Assistant- opinion of teacher, opinion of pupil Mobile team and –experience of team Valorisation of IEP

Individual education programmes (39409)

2.12. Optional literature (at the time of submission of study programme proposal)	
2.13. Quality assurance methods that ensure the acquisition of exit competences	Evaluation of the Course: two types of anonymous evaluations will be conducted after the course. First, internal evaluation after the seminar and exercises that will include perceived level of students' educational outcomes and suggestions to the lecturers about the topics included in this course. Second evaluation will be official anonymous evaluation prepared by University of Zagreb.
2.14. Other (as the proposer wishes to add)	

Creative Therapy III (39433)

1. GENERAL INFORMATION

1.1. Course teacher	Assis. Prof. Damir Miholić, PhD	1.6. Year of the study programme/ semester (summer, winter)	1 st / 2 nd (summer)
1.2. Name of the course	Creative Therapy III	1.7. Credits (ECTS)	5
1.3. Associate teachers	Assis. Prof. Ana Katušić, PhD Margareta Vidmar, MA	1.8. Type of instruction (number of hours L + E + S + e-learning)	30+15+30
1.4. Study programme (undergraduate, graduate, integrated)	Graduate, Educational Rehabilitation	1.9. Expected enrolment in the course	50
1.5. Status of the course	Mandatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1

2. COURSE DESCRIPTION

2.1. Course objectives	Introduce students to the theoretical and practical framework of creative therapy, respectively art / expressive methods in education, rehabilitation and therapy.
2.2. Course enrolment requirements and entry competences required for the course	
2.3. Learning outcomes at the level of the programme to which the course contributes	Students will understand and be able to apply the elements of artistic expression, dramatic expression, dance and movement, and music in the development of educational, rehabilitative and complementary-therapy programs in the context of a holistic approach to children with disabilities and people with disabilities.
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Students will be able to: <ul style="list-style-type: none"> - select some art, drama, music and dance techniques, plan and implement them within the educational, rehabilitative and supportive-therapy programs

Creative Therapy III (39433)

- evaluate the effects of applied programs
- analyse the scientific and professional literature in the field of creativity and art / expressive methods
- - develop research protocols in this area

2.5. Course content broken down in detail by weekly class schedule (syllabus)

Individual and group approach in programming of treatment
 Differential diagnosis of existential tension.
 Patient record and ISO-content
 Selection of problem areas and methods of treatment.
 Interdisciplinary communication and clinical approach
 The structure of the sessions in the field of art / expressive methods
 Introduction to session (warm up)
 Elaboration of topics in therapy - dynamic changes
 The therapeutic catharsis / insight / integration of personal experience
 Methods of clinical assessment
 The design of protocols for treatment and evaluation
 Art / expressive methods in educational and rehabilitation programs
 Qualitative research methods in this area
 Quantitative research methods in this area
 The design of the research protocol

2.6. Format of instruction:

- | | |
|--|--|
| <input checked="" type="checkbox"/> lectures | <input type="checkbox"/> independent assignments |
| <input checked="" type="checkbox"/> seminars and workshops | <input type="checkbox"/> multimedia and the internet |
| <input checked="" type="checkbox"/> exercises | <input type="checkbox"/> laboratory |

| <input checked="" type="checkbox"/> partial e-learning | <input type="checkbox"/> (other) |
| <input type="checkbox"/> field work | |

2.7. Comments:

International students will have opportunity to involve in course through consultations with course teachers

Creative Therapy III (39433)

2.8. Student responsibilities	Lectures and exercises attendances are obligatory. International students are obligated to attend consultations. Students are responsible to write seminars.			
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	1	Research	Practical training
	Experimental work		Report	Exercises 1
	Essay		Seminar essay 1	workshop 1
	Tests		Oral exam 1	(other)
	Written exam		Project	(other)
2.10. Grading and evaluating student work in class and at the final exam	Students will be evaluated through their active participation (personal and group work) in lectures, seminars and workshops. Final oral exam will be after the present or dedicated seminars and conducted individual and/or group assignments.			
2.11. Required literature (available in the library and via other media)	Title			Number of copies in the library
	Krušić, V. (2002). Therapeutic possibilities of drama. In "Art and Science in Life Potential Development ", Proceedings of the International Symposium, M. Prstačić (ed.). Zagreb: ERF University of Zagreb and HUPO (p. 269-281)

Multiple Disabilities and Visual Impairment (39460)

1. GENERAL INFORMATION

1.1. Course teacher	Assoc. Prof. Sonja Alimović, PhD	1.6. Year of the study programme/ semester (summer, winter)	1 st / 2 nd (summer)
1.2. Name of the course	Multiple Disabilities and Visual Impairment	1.7. Credits (ECTS)	6
1.3. Associate teachers	Martina Celizic	1.8. Type of instruction (number of hours L + E + S + e-learning)	15+30+15
1.4. Study programme (undergraduate, graduate, integrated)	Graduate study programme Educational Rehabilitation	1.9. Expected enrolment in the course	5
1.5. Status of the course	Mandatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1

2. COURSE DESCRIPTION

2.1. Course objectives	<p>To introduce students in complex intervening of multiple disabilities and visual impairment.</p> <p>To develop, in students, an ability to observe and assess persons with multiple disabilities and visual impairment.</p> <p>Capacitate students to independently devise rehabilitation goals and to create the support program for children with multiple disabilities and visual impairment.</p>
2.2. Course enrolment requirements and entry competences required for the course	Student is supposed to have the basic knowledge about visual impairment and the programs for children with visual impairment.
2.3. Learning outcomes at the level of the programme to which the course contributes	<ol style="list-style-type: none"> 1. Compare different support systems for persons with disability 2. Distinguish between different methods of scientific research 3. Create social inclusion process enhancement procedures for persons with disability at all levels of ecological system 4. Construct formal and informal procedures for assessing need satisfaction of a child or children with disability 5. Create procedures contributing to equalization of opportunities for persons with disabilities

Multiple Disabilities and Visual Impairment (39460)														
	<ol style="list-style-type: none"> 6. Evaluate the effect of education and rehabilitation procedures 7. Plan and implement scientific research based on ethical codes and principals of social usefulness 8. Develop cooperation with other experts, teams, organizations, and systems 9. 9. Use learning techniques leading to formal and/or personal promotion in education and rehabilitation field of expertise 													
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<ol style="list-style-type: none"> 1. reorganize education and rehabilitation methods intending to individualize the educational and rehabilitational approach 2. deduce specific skills and knowledge needed in working with children with multiple disabilities and visual impairment 3. devise education and rehabilitation program for persons with multiple disabilities and visual impairment 4. modify education and rehabilitation procedures considering their efficacy 5. evaluate the benefits of specific methods and techniques used in education and rehabilitation of persons with multiple disabilities and visual impairment 													
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ol style="list-style-type: none"> 1. Visual impairment with multiple disabilities 2. Observation and assessment of persons with multiple disabilities and visual impairment 3. Assessment and adapting the environment 4. Communication of persons with multiple disabilities and visual impairment 5. Cerebral visual impairment 6. Active learning and 5 step model 7. Planning the activity for a person and a group of persons with multiple disabilities and visual impairment 8. Assistive technology

Functional Assessment in Person with Visual Impairment (39445)

1. GENERAL INFORMATION

1.1. Course teacher	Assoc. Prof. Sonja Alimović, PhD	1.6. Year of the study programme/ semester (summer, winter)	1 st / 2 nd (summer)
1.2. Name of the course	Functional Evaluation of Persons with Visual Impairments	1.7. Credits (ECTS)	5
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	30+30+0
1.4. Study programme (undergraduate, graduate, integrated)	Graduate study programme Educational Rehabilitation	1.9. Expected enrolment in the course	15
1.5. Status of the course	Mandatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	

2. COURSE DESCRIPTION

2.1. Course objectives	<p>Is to educate students about the most common causes of visual impairment and their influence on functional visual impairment.</p> <p>Is to enable students to gain knowledge of selected assessment tools, tests and techniques used in functional assessment.</p> <p>Is to educate students for planning, designing, and implementing a rehabilitation program for persons with visual impairment.</p>
2.2. Course enrolment requirements and entry competences required for the course	Student is supposed to have the basic knowledge about visual impairment and the causes of visual impairment.
2.3. Learning outcomes at the level of the programme to which the course contributes	<ol style="list-style-type: none"> 1. Compare different support systems for persons with disability 2. Distinguish between different methods of scientific research 3. Create social inclusion process enhancement procedures for persons with disability at all levels of ecological system 2. Construct formal and informal procedures for assessing need satisfaction of a child or children with disability 3. Modify education and rehabilitation procedures considering their efficacy

Functional Assessment in Person with Visual Impairment (39445)

	<ol style="list-style-type: none"> 4. Create procedures contributing to equalization of opportunities for persons with disabilities 5. Evaluate the effect of education and rehabilitation procedures 6. Plan and implement scientific research based on ethical codes and principals of social usefulness 7. Explain expert information and procedures to general population 8. Develop cooperation with other experts, teams, organizations and systems 9. Manage his/her own continuous professional and personal development 10. Use learning techniques leading to formal and/or personal promotion in education and rehabilitation field of expertise
<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<ol style="list-style-type: none"> 1. Relate basic knowledge about main structures, neurobiological development and physiology of the visual pathway to development of functional vision. 2. Analyse correlation between visual pathway damage and functional visual impairment. 3. Draw conclusions about severity of functional vision impairment based on knowledge about causes of vision loss 4. Use the assessment tools and techniques in evaluation of functional vision. 5. Choose the best method of rehabilitation, based on assessment results. 6. Write functional vision assessment report. 7. Create and implement vision rehabilitation program.
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Visual functioning (visual functions and functional vision, the interrelation) (outcomes: 1-3) 2. Visual function assessment tools and techniques (outcomes: 1-7) 3. Functional vision assessment tools and techniques (outcomes: 4-7) 4. Visual function tests (Lea tests, Teller, Cardiff and others) (outcomes: 2-6) 5. Functional vision assessment (terminology, tools and techniques) (outcomes: 1 -4 and 6-9) 6. Procedures and objectives of functional vision assessment (outcomes: 1-9) 7. The social and communication skills (as a field of functional vision assessment and selection of instruments - SSRS, application of the instrument, analysis of the results, recommendations for rehabilitation) (outcomes: 3-9) 8. Daily living skills (as a field of functional vision assessment and selection, application and interpretation of instruments) (outcomes: 3-9)

Functional Assessment in Person with Visual Impairment (39445)

9. Orientation and mobility (as a field of functional vision assessment) (outcomes: 3-9)
10. Evaluation of school and community integration (outcomes: 3-9)
11. Assistive technology (outcomes: 3-9)
12. Step by step (outcomes: 3-8)
13. Lateralization tests (outcomes: 1-8)
14. Tactile perception Test (outcomes: 3-8)
15. Sensory integration in persons with visual impairment (outcomes: 3-8)

1.2. Name of the course	Croatian Sign Language 101	1.7. Credits (ECTS)	3
1.3. Associate teachers	Tomislav Radošević, mag. logoped.	1.8. Type of instruction (number of hours L + E + S + e-learning)	0+30+0
1.4. Study programme (undergraduate, graduate, integrated)	undergraduate Speech and Language Pathology	1.9. Expected enrolment in the course	15
1.5. Status of the course	elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	level 1

2. COURSE DESCRIPTION

2.1. Course objectives	<p>The aim of the course is to introduce students, theoretically and practically, with a sign language and other forms of manual communication of people with hearing impairments. The content and structure of the course develop basic communication skills and knowledge necessary to work with people with hearing impairments. The exercises in this course provide developing reception and expression skills, acquiring basic vocabulary and grammar of Croatian Sign Language (HZJ).</p> <p>Students will acquire basics for a conversation on HZJ. They will learn how to convey, receive and exchange information relating to family, time and daily activities, food and drink. They will acquire basic nonmanual grammatical features for expressing interrogative, negative, or declarative sentences. They will learn HZJ fingerspelled alphabets, as well as numbers.</p>
2.2. Course enrolment requirements and entry competences required for the course	-
2.3. Learning outcomes at the level of the programme to which the course contributes	<p>Provide the professional support in an educational process (the role of teaching assistants).</p> <p>Apply effective communication model to involve parents, educators, teachers and professionals in an interdisciplinary team in speech and language therapy.</p>

Croatian Sign Language101 (130843)				
	Apply a form of manual communication and an appropriate behavior in according to communication situation and individual communicational, auditory and language-speech skills of people with hearing impairments. Understand and define the characteristics of the deaf culture.			
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<p>To develop a visual and visuospatial skills required for receptive and expressive skills in HZJ.</p> <p>To distinguish between manual forms of communication.</p> <p>To distinguish between facial grammar and expressing emotions and nonverbal communication.</p> <p>To distinguish and use different types of sentences (declarative, interrogative, negative).</p> <p>To use appropriate vocabulary, grammar and rules in communication and interaction with people with hearing impairments.</p> <p>To define the main features of the community and culture of the Deaf.</p> <p>To define communicational, language and cultural differences between the Deaf and Hearing communities.</p> <p>To develop a groundwork for further learning HZJ.</p>			
2.5. Course content broken down in detail by weekly class schedule (syllabus)	-			
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input checked="" type="checkbox"/> independent assignments <input checked="" type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments:	
2.8. Student responsibilities	To attend the course regularly and encouraged to actively participate in class.

Sociopedagogic Aspects of Hearing Impairments (39331)

1. GENERAL INFORMATION

1.1. Course teacher	Assis. Prof. Marina Milković, PhD	1.6. Year of the study programme/ semester (summer, winter)	2 nd / 4 th (summer)
1.2. Name of the course	Sociopedagogic Aspects of Hearing Impairments	1.7. Credits (ECTS)	3
1.3. Associate teachers	Assis. Prof. Iva Hrastinski, PhD	1.8. Type of instruction (number of hours L + E + S + e-learning)	30+0+15+6
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate	1.9. Expected enrolment in the course	
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	2

2. COURSE DESCRIPTION

2.1. Course objectives	This course introduces students to the modern approach to people with disabilities and the role of society in the development of disabilities, with an emphasis on hearing impairment. It addresses issues of education in a social context as well as the family and its role.
2.2. Course enrolment requirements and entry competences required for the course	-
2.3. Learning outcomes at the level of the programme to which the course contributes	<ul style="list-style-type: none"> - providing basic professional information to persons involved in habilitation or rehabilitation, their families and the wider environment, as well as other experts participating in its implementation, - providing support for creating conditions for encouraging early communication and language-speech development in the system of (pre)school education, - searching literature, databases and other sources of information, - developing awareness of the implementation of professional ethics and responsibility in speech therapy practice and recognize the need and readiness for inclusion in lifelong learning

Sociopedagogic Aspects of Hearing Impairments (39331)

<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>Students will be able to:</p> <ul style="list-style-type: none"> - distinguish terminology in the field of disability and connect the main ideas of the social model, - distinguish national and international documents and the rights of people with disabilities, - distinguish between the specific needs of families with children with disabilities and people with disabilities in terms of different situations and stages of the life cycle, - distinguish learning strategies of deaf and hearing students and their cognitive characteristics function. 																												
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Models of approach to disability; Significant documents in the field of disability 2. Historical overview of the development of the area; Terminological definitions 3. Family; Communication; Support 4. Learning strategies; The relationship between teaching and learning 5. Learning and socioemotional development 																												
<p>2.6. Neurodevelopmental Language Disorders (130839)

1. GENERAL INFORMATION

1.1. Course teacher	Prof. Tatjana Prizl Jakovac, PhD Assis. Prof. Blaženka Brozović, PhD	1.6. Year of the study programme/ semester (summer, winter)	2 nd / 4 th (summer)
1.2. Name of the course	Neurodevelopmental language disorders	1.7. Credits (ECTS)	4
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	15+15+15
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate, Speech and Language Pathology	1.9. Expected enrolment in the course	Yes
1.5. Status of the course	Mandatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	On-site or on-line learning, depending on the epidemiological situation. Some materials available on the Merlin learning platform.

2. COURSE DESCRIPTION

2.1. Course objectives	The aim of this course is to make students gain knowledge about the aetiology and phenomenology of atypical language development with special emphasis on the role of the neurodevelopmental risk factors affecting development during prenatal, perinatal, and postnatal period. The accent will also be placed on the various neurodevelopmental disorders such as perinatal brain lesions, epilepsy, developmental brain malformations and neurodevelopmental syndromes that might have a negative impact on the course of the language development.
2.2. Course enrolment requirements and entry competences required for the course	Basic knowledge of the human anatomy and physiology, basic knowledge about the typical course of communication, speech, and language development.
2.3. Learning outcomes at the level of the programme to which the course contributes	The course will contribute to the study of Speech and Language Pathology providing students with the basic knowledge and understanding of the role of different neurodevelopmental risk factor in the genesis of the language disorders as well as the ability to make the analysis and synthesis of all relevant medical data gathered through the process of the anamnestic assessment.
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<ol style="list-style-type: none"> 1. Understand and apply selected professional terminology in the field of perinatology, obstetrics and neuropediatric. 2. Explain and interpret basics of the embryonal and foetal development as well as those of brain development. 3. To perform anamnestic data assessment as well as to identify neurodevelopmental risk factors relevant for the language acquisition process. 4. State and explain neurodevelopmental disorders that might lead to developmental language disorders. 5. To define and to describe the impact of the epileptic changes and antiepileptic medications on language and language processing.

Neurodevelopmental Language Disorders (130839)

	6. Differentiate, describe and discuss aetiology and symptomatology of different neurodevelopmental syndromes and malformations as well as their influence on language acquisition. 7. Describe and differentiate the aetiology and pathophysiology of the childhood aphasia, and traumatic brain injury in children. 8. Analyse obtained data and utilize it in the planning of general and specific procedures in speech therapy.		
2.5. Course content broken down in detail by weekly class schedule (syllabus)	1. Neurodevelopmental risk factors 2. Neurodevelopmental disorders (terminology, aetiology, and pathogenesis of different neurodevelopmental disorders) 3. Embryonal and foetal development. Brain development. 4. Early neural development and signs of the disorders of neural origin. Different diagnostic methods for the structural and functional brain assessment in new-borns and small children. 5. Impact of the prematurity and intrauterine growth retardation (IGR) on general developmental outcome and language acquisition. 6. New-borns in the Neonatal Intensive care unit (NICU) – role of the mechanic ventilation, tracheostomy and gavage feeding in the aetiology of communication, speech, and language disorders. 7. Perinatal brain lesions (aetiology and types). 8. Developmental outcomes in children with perinatal brain lesions (communication, speech, language, and cognitive development). 9. 1st Continual assessment 10. Hemispherectomy. Developmental brain plasticity. 11. Epilepsy and epileptic syndromes as a risk factor in the speech, language, and cognitive development: course and outcomes. 12. Neurodevelopmental syndromes. The impact of neurodevelopmental malformations and brain tumours on the language acquisition and occurrence of language disorders. 13. Neurodevelopmental syndromes. The impact of neurodevelopmental malformations and brain tumours on the language acquisition and occurrence of language disorders. 14. Traumatic brain injury in children. 15. Childhood aphasia. 16. 2nd Continual assessment		
2.6. Communication Disorders Following Traumatic Brain Injuries (101943)

1. GENERAL INFORMATION

1.1. Course teacher	Prof. Tatjana Prizl Jakovac, PhD	1.6. Year of the study programme/ semester (summer, winter)	3 rd / 6 th (summer)
1.2. Name of the course	Communication Disorders Following Traumatic Brain Injuries	1.7. Credits (ECTS)	3
1.3. Associate teachers	Ana Došen, assistant	1.8. Type of instruction (number of hours L + E + S + e-learning)	15+15+15
1.4. Study programme (undergraduate, graduate, integrated)	undergraduate	1.9. Expected enrolment in the course	
1.5. Status of the course	obligatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1,2

2. COURSE DESCRIPTION

2.1. Course objectives	The objective of the course is for students to learn about causes, types, and degrees of traumatic brain injury, to learn how to recognize difficulties in communication, cognitive and social areas, and to learn about different methods of speech-language assessment in different stages of recovery.
2.2. Course enrolment requirements and entry competences required for the course	For SLP students. Basic knowledge of functional anatomy and physiology of the head and neck
2.3. Learning outcomes at the level of the programme to which the course contributes	By the end of the course students will be able to describe epidemiology, ethology, classification, and effects of traumatic brain injury. They will be able to recognize and describe different consequences of TBI, and patterns of recovery from TBI. Students will be familiar with the assessment protocol and different approaches to rehabilitation.
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Learning outcomes are: <ul style="list-style-type: none"> – to recognize and describe types of traumatic brain injury (TBI) – to list and describe the consequences of TBI

Communication Disorders Following Traumatic Brain Injuries (101943)

	<ul style="list-style-type: none"> – to analyse and compare different states of consciousness. – to describe the role of SLPs in intensive care units and compare it with the role of SLPs in other medical/non-medical institutions – to analyse cognitive-communication difficulties following TBI – to distinguish and explain similarities and differences between cognitive-communication disorders and other developmental or acquired speech and language disorders – to differentiate and explain the basic principles of assessment of cognitive-communication disorders – to recognize and explain dysarthria and apraxia following TBI – to define different approaches in rehabilitation, explain and determine the application of different approaches depending on the type and consequences of TBI 										
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1. Definitions and causes of traumatic brain injury (TBI). 2. Classification of TBI 3. Consequences of TBI 4. State of consciousness after TBI 5. The role of the speech-language pathologist in the intensive care unit 6. Assessment of speech, language, and communication after TBI 7. Colloquium 1 (mandatory) 8. Different approaches in the TBI rehabilitation 9. Dysarthria 10. Apraxia 11. Standardized, non-standardized, and clinician-prepared protocols for assessing cognitive-communication difficulties after TBI 12. Practical application 13. Colloquium 2 (mandatory)

Course description for graduate study programme Speech and Language Pathology

Child Language Corpora (175138)			
1. GENERAL INFORMATION			
1.1. Course teacher	Assoc. Prof. Gordana Hržica, PhD	1.6. Year of the study programme/ semester (summer, winter)	1 st / 2 nd (summer)
1.2. Name of the course	Child Language Corpora	1.7. Credits (ECTS)	3
1.3. Associate teachers	Sara Košutar, mag. logoped. Matea Kramarić, mag. psych.	1.8. Type of instruction (number of hours L + E + S + e-learning)	0+15+15+ e-learnig activities
1.4. Study programme (undergraduate, graduate, integrated)	Graduate Speech and Language Pathology	1.9. Expected enrolment in the course	8 - 30
1.5. Status of the course	optional	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	Level 2
2. COURSE DESCRIPTION			
2.1. Course objectives	<p>This course is designed to provide students with a basic knowledge of the usage of language corpora in linguistic research. Specific emphasis will be given to the role of longitudinal child language corpora. Students will be trained to use the software package CLAN and coding system CHAT, all part of the CHILDES international child language database.</p> <p>Students will be required to engage with the readings, database studies and exercises concerning types of corpora. They will collect language samples and engage in coding of spoken language and analysing language samples.</p>		
2.2. Course enrolment requirements and entry competences required for the course	<p>Required competences: basic knowledge of linguistics, psycholinguistics (language acquisition), basic computer skills.</p>		

Child Language Corpora (175138)

2.3. Learning outcomes at the level of the programme to which the course contributes

The course will contribute to the study program of speech and language pathology by providing the basic framework for understanding the role of corpora in language research, by training student to use language-sampling tools and to apply relevant analyses.

2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)

The course framework will provide students with the basis to negotiate issues of

1. Language corpora;
2. Language sampling;
3. Course activities will provide students with the ability to apply;
4. Adequate language sampling;
5. Coding of spoken-language samples;
6. Analyses of spoken-language samples.

Week 1: Spoken and written language corpora

Week 2: Language sampling

Week 3: Language sampling in speech and language pathology

Week 4: Morphological analysis of language samples 1

Week 5: Morphological analysis of language samples 2

Week 6: Coding in CHAT

2.5. Course content broken down in detail by weekly class schedule (syllabus)

Week 7: Error coding

Week 8: Language samples final checking with CHECK programme

Week 9: Child language corpora-based research 1

Week 10: Child language corpora-based research 2

Week 11: Student work on language samples

Week 12: Student work on language samples

Week 13: Limitations of corpus method in language research

Week 14: Student presentations

2.6. Format of instruction:

lectures

independent assignments

2.7. Comments:

2.12. Optional literature (at the time of submission of study programme proposal)

2.13. Quality assurance methods that ensure the acquisition of exit competences

2.14. Other (as the proposer wishes to add)

Exit competences will be ensured if student passes all the requirements of this course.

Narrative Assessment in Speech and Language Pathology (39282)

1. GENERAL INFORMATION

1.1. Course teacher	Assoc. Prof. Gordana Hržica, PhD	1.6. Year of the study programme/ semester (summer, winter)	2 nd / 3 rd (winter)
1.2. Name of the course	Narrative Assessment in Speech and Language Pathology	1.7. Credits (ECTS)	3
1.3. Associate teachers	Sara Košutar, PhD	1.8. Type of instruction (number of hours L + E + S + e-learning)	15+0+15
1.4. Study programme (undergraduate, graduate, integrated)	Graduate Speech and Language Pathology	1.9. Expected enrolment in the course	
1.5. Status of the course	optional	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	2, 20%

2. COURSE DESCRIPTION

2.1. Course objectives	The goals of this course are: (1) to enable students to comprehend the importance of narrative abilities in language development, (2) to learn how to independently perform assessment of narrative abilities as a part of speech and language assessment, (2) to learn how to foster narrative abilities.
2.2. Course enrolment requirements and entry competences required for the course	NA
2.3. Learning outcomes at the level of the programme to which the course contributes	
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	After this course the student will be able to: <ul style="list-style-type: none"> – List and describe the types of materials for narrative assessment – List and describe levels of narrative assessment

Narrative Assessment in Speech and Language Pathology (39282)

2.5. Course content broken down in detail by weekly class schedule (syllabus)

- List, describe and apply assessment of the story macrostructure
- List, describe and apply assessment of the story microstructure
- Describe and recognise the elements of the cohesion and coherence in the story
- List and describe referential devices in the story
- Recognise elements of the evaluative function in narratives
- List basic devices for the fostering of narrative abilities

Week 1: Narratives and language development

Week 2: Narratives and reading

Week 3: Development of narrative abilities

Week 4: Genres and techniques of narration

Week 5: Story macrostructure: Story grammar

Week 6: Story macrostructure: Structural complexity

Week 7: Story macrostructure: Internal state terms

Week 8: Summing up: Story macrostructure

Week 9: Story microstructure: productivity

Week 10: Story microstructure: lexical diversity

Week 11: Story microstructure: syntactic complexity

Week 12: Summing up: Story microstructure

Week 13: Pragmatics of the story: Evaluative function

Week 14: Pragmatics of the story: Referential devices

Week 15: Fostering narrative abilities

Neurolinguistics II (81103)

1. GENERAL INFORMATION

1.1. Course teacher	Prof. Marijan Palmović, PhD	1.6. Year of the study programme/ semester (summer, winter)	1 st / 2 nd (summer)
1.2. Name of the course	Neurolinguistics II	1.7. Credits (ECTS)	3
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	30+15+0
1.4. Study programme (undergraduate, graduate, integrated)	Graduate, Speech and Language Pathology	1.9. Expected enrolment in the course	yes
1.5. Status of the course	optional	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	No e-learning, just learning. Some materials will be available on the Merlin system

2. COURSE DESCRIPTION

2.1. Course objectives	Getting more elaborate knowledge on neurolinguistics
2.2. Course enrolment requirements and entry competences required for the course	Basic linguistic knowledge, basic knowledge on brain anatomy; background education in one of the disciplines: linguistics, medicine, speech & language pathology, psychology, philology
2.3. Learning outcomes at the level of the programme to which the course contributes	In depth knowledge of chosen topics within neurolinguistics
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Methodology of neurolinguistics research; from neuropsychology to brain imaging; experimental methods in neurolinguistics; ANN in neurolinguistics

Neurolinguistics II (81103)					
2.5. Course content broken down in detail by weekly class schedule (syllabus)	1. Basic methods in neurolinguistics (neuropsychology); 2. Brain imaging methods in neurolinguistics; 3. Artificial neural networks in neurolinguistics; 4. Language pathology and contemporary brain imaging studies; 5. Theoretical accounts; 6-14 students guided experimental work on chosen topics

	Written exam	Project	(other)
2.10. Grading and evaluating student work in class and at the final exam	Students must pass 2 tests and final exam: 1.test – 12 points 2. test - 12 points Final exam – 46 points Course attendance – 6 points Attendance on seminars – 6 points Activity on seminars – 18 points Total: 100 points		
2.11. Required literature (available in the library and via other media)	Title		Number of copies in the library Availability via other media
2.12. Optional literature (at the time of submission of study programme proposal)			
2.13. Quality assurance methods that ensure the acquisition of exit competences	Tests, final exam, and activity on the seminars		
2.14. Other (as the proposer wishes to add)			

Sign Language Linguistic Structure (139574)

1. GENERAL INFORMATION

1.1. Course teacher	Assis. Prof. Marina Milković, PhD	1.6. Year of the study programme/ semester (summer, winter)	1 st / 2 nd (summer)
1.2. Name of the course	Sign Language Linguistic Structure	1.7. Credits (ECTS)	3
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	15+0+15
1.4. Study programme (undergraduate, graduate, integrated)	graduate	1.9. Expected enrolment in the course	15-20
1.5. Status of the course	elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	Level 1

2. COURSE DESCRIPTION

2.1. Course objectives	The course introduces students to the linguistic structure of sign languages, primarily Croatian Sign Language (HZJ) and its comparison to other national sign languages, at different levels (phonology, morphology, syntax, semantics and pragmatics). Also, discusses issues related to the psycholinguistic and neurolinguistic research of sign language, as well as variation and language change, language use in contact situations, and the use of sign language in deaf education.
2.2. Course enrolment requirements and entry competences required for the course	Croatian Sign Language 101 / Basic knowledge of any sign language
2.3. Learning outcomes at the level of the programme to which the course contributes	
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<ul style="list-style-type: none"> - to learn how to observe, describe, and explain patterns of grammatical structure in sign languages - to use the basic terminology of linguistics to describe the sign parts, and sentences of Croatian Sign Language

Sign Language Linguistic Structure (139574)				
	<ul style="list-style-type: none"> - to explore key structural patterns in (varieties of) Croatian Sign Language and other sign languages - to investigate the relationships between structure and meaning - to understand and apply basic principles of linguistic theory and argumentation - to discuss the findings of linguistic research in relation to practical issues such as language teaching, child language development, and cross-cultural understanding 			
2.5. Course content broken down in detail by weekly class schedule (syllabus)				
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input checked="" type="checkbox"/> seminars and workshops <input checked="" type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input type="checkbox"/> partial e-learning <input checked="" type="checkbox"/> field work	<input checked="" type="checkbox"/> independent assignments <input checked="" type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Course description for undergraduate study programme Social Pedagogy

Theories of Prevention I (93883)			
1. GENERAL INFORMATION			
1.1. Course teacher	Assis. Prof. Miranda Novak, PhD	1.6. Year of the study programme/ semester (summer, winter)	3 rd / 5 th (winter)
1.2. Name of the course	Theories of Prevention I	1.7. Credits (ECTS)	2
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	30+0+0+0
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate study Social Pedagogy	1.9. Expected enrolment in the course	-
1.5. Status of the course	Obligatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	-
2. COURSE DESCRIPTION			
2.1. Course objectives	<p>Course Theories of Prevention 1 is an introductory course in prevention science covering themes about the historical development of prevention, definitions of prevention, terms of mental health promotion and prevention of mental and behavioural disorders as well as levels of prevention interventions and theoretical background of preventive concepts.</p> <p>Objective is to familiarize students with the theoretical basics of preventing behavioural problems and risk behaviour of children and youth.</p>		
2.2. Course enrolment requirements and entry competences required for the course	-		

Theories of Prevention I (93883)	
2.3. Learning outcomes at the level of the programme to which the course contributes	Understanding and use of relevant theoretical approaches to the prevention of behaviour disorders and risky behaviour of children and youth.
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<p>By the end of the course/module the student will be able to:</p> <ul style="list-style-type: none"> - Use a recent terminology and conceptual definitions of prevention science - Critically judge historical facts and context of prevention - Select and defend arguments to advocate preventive practices and prevention research - Demonstrate knowledge and understanding of different models of prevention - Connect levels and a continuum of risk with outcomes in child and youth behavior - Integrate lessons learned in the selection of prevention strategies, the level of prevention, models and prevention programs for children and youth in practice - Critically assess the level to which individual prevention programs belong - Integrate the various theoretical approaches underlying the understanding of the development of children and youth
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<ol style="list-style-type: none"> 1. Introductory lecture / Definition of prevention and historical overview of the development of prevention 2. The terms of the risk and risk behavior 3. The terms mental health, positive mental health, the promotion of mental health 4. Levels of preventive intervention and intervention models of prevention 5. Levels of prevention interventions and environmental approach 6. Preventive approaches to internalized behavioural problems and effective programs 7. Preventive approaches to externalized behavioural problems and effective programs 8. Theoretical foundations of prevention: the concept of risk and protective factors 9. Theoretical foundations of prevention: the concept of development assets and the concept of positive developments 10. Theoretical foundations of prevention: resilience 11. Theoretical foundations of prevention: social and emotional learning 12. Independent work on prepared materials

Theories of Prevention I (93883)			
	13. Theoretical foundations of prevention: development psychopathology		
	14. Theoretical foundations of prevention: the concept of mental health promotion		
2.6. Format of instruction:	<input checked="" type="checkbox"/> lectures <input type="checkbox"/> seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input checked="" type="checkbox"/> independent assignments <input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	2.7. Comments:
2.8. Student responsibilities	Classes attending is required (attendance at a minimum of 13 class schedule), as well as active participation in class.		
2.9. Screening student work <i>(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)</i>	Class attendance	1	Research
	Experimental work		Report
	Essay		Seminar essay
	Tests	1	Oral exam
	Written exam		Project
2.10. 2.10. Grading and evaluating student work in class and at the final exam	<p>Examination:</p> <p>Through two colloquium and written exams. The condition for taking the examination is classes attendance (can be absent from a maximum of two terms, with or without a note).</p> <p>The final exam is possible to pass through colloquium. If the exam is taken by colloquium, both colloquiums should be positively scored. Overall score is the average score on each colloquium.</p> <p>Final, written, exam access all the students who did not go to one of colloquiums and / or have not received a positive grade on both colloquiums.</p>		
2.11. Required literature (available in the library and via other media)	Title		Number of copies in the library Availability via other media

Comparative Criminology I (89947)			
1. GENERAL INFORMATION			
1.1. Course teacher	Assoc. Prof. Lisa Decker, PhD Assoc. Prof. Dalibor Doležal, PhD	1.6. Year of the study programme/ semester (summer, winter)	2 nd / 4 th (summer)
1.2. Name of the course	Comparative Criminology I	1.7. Credits (ECTS)	3
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	30+0+15
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate, Social Pedagogy	1.9. Expected enrolment in the course	30 (American + Croatian students)
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1
2. COUSE DESCRIPTION			
2.1. Course objectives	<p>Every year the course topic changes; generally, course objectives are:</p> <ul style="list-style-type: none"> - that the American and Croatian students learn about various historical, cultural, normative and practical aspects of criminological areas and are competent in their comparative analysis - that students master specific communication skills in discussions on assigned topics, and master the skills of argument with regard to the presence of students from other cultures - for Croatian students' goal is to increase the professional competence of communication in a foreign language 		
2.2. Course enrolment requirements and entry competences required for the course	<p>Basic courses in criminology, corrections, and victimology – passed</p> <p>Fluency in English</p> <p>In each even year (2012, 2014, 2016) when the course is held at ISU - financial support to travel to USA must be provided</p>		

Comparative Criminology I (89947)											
2.3. Learning outcomes at the level of the programme to which the course contributes	<ul style="list-style-type: none"> - understanding crime as a social and individual phenomenon, and its specificities in various countries - to be familiar with social reactions to crime in different countries - developing interpersonal communication with colleagues from different cultural influences - assessing the range of programs and projects aimed at combating crime in different countries 										
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<p>The student will be able to:</p> <ul style="list-style-type: none"> - distinguish between legalistic and statutory solutions in the selected field of crime study - prepare a presentation on a chosen topic of discussion - compare the phenomenology of crime in different countries - compare the preventive strategies to combat crime in different countries - propose new solutions in the fight against crime for his/her own country - identify new tendencies in criminological research in different countries - compare the results of contemporary research in different countries - demonstrate the improvement of skill of using professional terminology in English 										
2.5. Course content broken down in detail by weekly class schedule (syllabus)	<p>The classes will be held every day for the last 2 weeks in May</p> <p>Topics change every year, Examples of recent topics:</p> <p>Comparative approaches to probation, Comparative approaches to prison systems Police and criminality - a comparative approach A comparative approach to juvenile delinquency The phenomenology of crime in America and Europe</p>										
2.6. Format of instruction:	<table style="width: 100%; border: none;"> <tr> <td><input checked="" type="checkbox"/> lectures</td> <td><input checked="" type="checkbox"/> independent assignments</td> </tr> <tr> <td><input checked="" type="checkbox"/> seminars and workshops</td> <td><input checked="" type="checkbox"/> multimedia and the internet</td> </tr> <tr> <td><input type="checkbox"/> exercises</td> <td><input type="checkbox"/> laboratory</td> </tr> <tr> <td><input type="checkbox"/> online in entirety</td> <td><input type="checkbox"/> work with mentor</td> </tr> <tr> <td><input type="checkbox"/> partial e-learning</td> <td><input type="checkbox"/> (other)</td> </tr> </table>	<input checked="" type="checkbox"/> lectures	<input checked="" type="checkbox"/> independent assignments	<input checked="" type="checkbox"/> seminars and workshops	<input checked="" type="checkbox"/> multimedia and the internet	<input type="checkbox"/> exercises	<input type="checkbox"/> laboratory	<input type="checkbox"/> online in entirety	<input type="checkbox"/> work with mentor	<input type="checkbox"/> partial e-learning	<input type="checkbox"/> (other)
<input checked="" type="checkbox"/> lectures	<input checked="" type="checkbox"/> independent assignments										
<input checked="" type="checkbox"/> seminars and workshops	<input checked="" type="checkbox"/> multimedia and the internet										
<input type="checkbox"/> exercises	<input type="checkbox"/> laboratory

<input type="checkbox"/> partial e-learning	<input type="checkbox"/> (other)										
	2.7. Comments:										

Comparative Criminology I (89947)				
	<input type="checkbox"/> field work			
2.8. Student responsibilities				
2.9. Screening student work (name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)	Class attendance	1	Research	Practical training
	Experimental work		Report	Independent work (other) 1
	Essay		Seminar essay	(other)
	Tests		Oral exam	(other)
	Written exam	1	Project	(other)
2.10. Grading and evaluating student work in class and at the final exam	score on the written examination depends on the points scored with a pass to be resolved 60% of exam questions			
2.11. Required literature (available in the library and via other media)	Title		Number of copies in the library	Availability via other media
	literature, considering the topic, is delivered on time to all students in electronic form			
2.12. Optional literature (at the time of submission of study programme proposal)				

Comparative Criminology I (89947)

2.13. Quality assurance methods that ensure the acquisition of exit competences	internal evaluation of the course by learning outcomes and formal university evaluation
2.14. Other (as the proposer wishes to add)	The course is held as an intensive two-week course in May 2023 at the Indiana State University, according to the bilateral agreement between our universities (Indiana State University and University of Zagreb). Croatian and American students have lectures in English during 2 weeks and pass the exam. All students cover their own costs of accommodation and travel.

Phenomenology of Behavioural Disorders (39599)

1. GENERAL INFORMATION

1.1. Course teacher	Prof. Neven Ricijaš, PhD Assis. Prof. Dora Dodig Hundrić, PhD	1.6. Year of the study programme/ semester (summer, winter)	1 st / 2 nd (summer)
1.2. Name of the course	Phenomenology of Behavioural Disorders	1.7. Credits (ECTS)	6
1.3. Associate teachers	Sabina Mandić, mag. paed. soc.	1.8. Type of instruction (number of hours L + E + S + e-learning)	30+0+30
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate, Social Pedagogy	1.9. Expected enrolment in the course	-
1.5. Status of the course	Elective Course	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1

2. COURSE DESCRIPTION

2.1. Course objectives	Developing basic knowledge about behavioural disorders, their classification, etiology and phenomenological characteristics as well as fundamental skills for competent professional activities.
2.2. Course enrolment requirements and entry competences required for the course	-
2.3. Learning outcomes at the level of the programme to which the course contributes	The student will be able to: <ul style="list-style-type: none"> - Demonstrate basic knowledge about the characteristics of individuals from the population. - Integrate certain aspects of the bio-psycho-social-pedagogical approach to the individual in a holistic, interdisciplinary approach to people. - Demonstrate basic knowledge of etiology and phenomenology of behavioural problems.

Phenomenology of Behavioural Disorders (39599)

<p>2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</p>	<p>The students will be able to:</p> <ul style="list-style-type: none"> - define and describe the main etiological factors for the development of behavioural disorders - define and describe major classifications of behavioural disorders - differentiate behavioural disorders - demonstrate knowledge of the characteristics of children and youth with behavioural problems - understand the social significance and prevalence of behavioural problems - link theoretical concepts of etiology and phenomenology of behavioural disorders with concrete examples - understand the complex bio-psycho-social structure of behavioural disorders - demonstrate basic knowledge and use of scientific terminology (in oral communication) 	
<p>2.5. Course content broken down in detail by weekly class schedule (syllabus)</p>	<ol style="list-style-type: none"> 1.1. Introductory lecture 1.2. Behaviour and Behavioural Disorders - terminology and definitions 1.3. Classifications of Behavioural Disorders 1.4. The Etiology of Behavioural disorders 1.5. 1.5. Status of the course	Obligatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	
2. COURSE DESCRIPTION			
2.1. Course objectives			
2.2. Course enrolment requirements and entry competences required for the course			
2.3. Learning outcomes at the level of the programme to which the course contributes			
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)			
2.5. Course content broken down in detail by weekly class schedule (syllabus)			
2.6. Format of instruction:	<input type="checkbox"/> lectures	<input type="checkbox"/> independent assignments	2.7. Comments:

Contemporary Methods in Treatment of Addicts (39557)

	<input type="checkbox"/> seminars and workshops <input type="checkbox"/> exercises <input type="checkbox"/> online in entirety <input type="checkbox"/> partial e-learning <input type="checkbox"/> field work	<input type="checkbox"/> multimedia and the internet <input type="checkbox"/> laboratory <input type="checkbox"/> work with mentor <input type="checkbox"/> (other)	
2.8. Student responsibilities			
2.9. Screening student work (<i>name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course</i>)	Class attendance	Research	Practical training
	Experimental work	Report	Exercises
	Essay	Seminar essay	(other)
	Tests	Oral exam	(other)
	Written exam	Project	(other)
2.10. Grading and evaluating student work in class and at the final exam	-		
2.11. Required literature (available in the library and via other media)	Title	Number of copies in the library	Availability via other media
2.12. Optional literature (at the time of submission of study programme proposal)			
2.13. Quality assurance methods that ensure the acquisition of exit competences			

Contemporary Methods in Treatment of Addicts (39557)

2.14. Other (as the proposer wishes to add)

For all students, both undergraduate and graduate level (no ECTS)

Physical and Health Education

Students can choose *Physical and Health Education* in both semesters, but they don't get ECTS credits for taking the course.
